

MoonShyne™ is the latest scientific formulation providing both excellent vehicle washing properties along with a monomolecular protective barrier which gives not only finish protection but a beautiful lasting shine all in one simple application. Great where frequent washing and/or polishing is necessary to maintain superior vehicle appearance such as new and used cars and trucks, taxi and police fleets, fire trucks, ambulances, delivery vans, transport and municipal vehicle fleets, buses, subway cars, trains and aircraft.

MANUAL WASHING - Pre-rinse vehicle to remove excess soils. Using **MoonShyne™** in dilution of 3 to 6 mL per litre (2 to 1 oz per gallon) of hot water, apply via soft wash brush, sponge or mitt to all vehicle surfaces working from the lowest point up. Wash vehicle in sections, thoroughly hose or pressure rinsing each section (from the bottom up) before proceeding to the next section. Do not allow solution to dry on vehicle prior to rinsing. Thoroughly flush rinse entire vehicle working from the top down. Allow to air dry or chamois dry where excessive hard water or fast drying conditions exist.

AUTOMATIC or PRESSURE WASHING - Where practical, pre-rinse as above. Mix **MoonShyne™** in solution tank or inject directly into automatic system at a rate of 12 to 3 mL per litre (4 to 2 oz per gallon) of hot water. Wash vehicle via usual method (from the lowest point up), brushing areas of extreme soil. Rinse vehicle thoroughly (from the bottom up) followed by flush rinsing the entire vehicle from the top down. Do not allow solution to dry on vehicle prior to rinsing. Allow to air dry or chamois dry where excessive hard water or fast drying conditions exist.

NOTE - For best results avoid washing vehicles in direct sunlight or under extreme heat conditions.

**Creates a Superior
Vehicle Appearance**

MoonShyne™

**CLEANS - PROTECTS and
SHINES**

For Use In Industrial and Commercial Environments

CAUTION: Keep out of reach of children
